GitHub: https://www.github.com/RishaanVats
Portfolio: https://rishumishra.web.app/

Frontend Engineer with ~3 years of professional experience building scalable web applications using **Angular, TypeScript, and JavaScript**. At Wipro, I developed enterprise applications **for Microsoft (HackBox)**, focusing on **reusable components, responsive design, performance optimization and seamless API integration**. Currently upskilling to Angular 17+.

TECHNICAL SKILLS

Frontend: Angular, AngularJS, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Web Development, Gulp
Web Engineering: SPA Development, Component-Based architecture, REST API Integration, Web Accessibility (WCAG/ARIA), UI Performance Optimization, Lighthouse, Lazy loading, Angular Signals, Reactive Forms
Backend & Data Integration: JWT, Node.js (Basic), Express.js (Basic)
Developer Tools & Workflow: Git, GitHub, Azure Boards, Postman, Chrome DevTools, VS Code, npm, Debugging, CI/CD
Libraries: Chart.js, Bootstrap Icons, Font Awesome
AI & Workflow Automation: Prompt Engineering, AI-Driven code generation, Tools (Claude, GitHub Copilot)

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Frontend)

Wipro Ltd | Hyderabad | Jul 2019 - Apr 2022

- Built and maintained enterprise-scale frontend applications in AngularJS, JavaScript, HTML5 and CSS3
- Created reusable, component-based UI modules that reduced duplicate code and improved maintainability and feature delivery speed
- Delivered production-ready frontend solutions for Microsoft's HackBox application serving external users
- Developed an onboarding workflow behind **6,000+ external hackathon participants activations**
- **Collaborated with designers, backend engineers, QA teams, and stakeholders** to translate business requirements into frontend solutions, tracking work in Azure Boards, running builds and deployments through Azure pipelines, and managing code with Git
- Partnered with peer frontend engineers to execute a high-impact refactoring effort, resolving over 100 UI accessibility bugs to meet Microsoft's enterprise compliance standards
- Integrated REST APIs and optimized frontend validation logic, reducing login failures by 50% **(**from **20% to 10%)**
- Led client communication as **Single Point of Contact (SPOC)** for requirement gathering and delivery coordination, reducing rework
- Built responsive, cross-browser applications and supported deployments within Agile development cycles

Career Break: UPSC Civil Services Examination | May 2022 - Dec 2025

Prepared for the UPSC Civil Services Examination (CSE)

Skill Refresh | Jan 2026 - Present

- Rebuilding Angular 17+ expertise through hands-on projects (see Projects)

PROJECTS

Sudarshan Analytics Dashboard

Angular | JSON Server | REST API | Portfolio Project | Deployed | GitHub Available

- Built a responsive Angular SPA with reusable components, Bootstrap layout, integrated with REST APIs for monitoring campaign activity and analytics
- Implemented Angular Signals across 8 views and modular components for scalable frontend state management
- Built 6 chart types (Chart.js) fed by transformed API data for KPI visualizations and reporting
- Optimized frontend performance to achieve a 98+ Lighthouse Performance score
- Deployed the frontend on Vercel, integrated with backend API deployed on Render

GTG - E-Commerce Landing Interface

HTML5 | CSS3 | JavaScript | Responsive Design | Firebase | GitHub Available

- Built a responsive single-page e-commerce interface with an interactive product selection and responsive navigation deployed on Google Firebase
- Applied lazy loading, semantic HTML and ARIA attributes for performance and accessibility
